1:15PM Networking Break / Vendor discovery

1:45PM

The Hidden Impacts of HIT Infrastructure on Patient Care and Clinician Satisfaction

Brian Dalhover

Director of Solutions Eng. & Healthcare Services, ENA

When a healthcare organization's technology fails, it doesn't just disrupt operations: it hinders the delivery of optimal patient care. This session will outline the connectivity and cybersecurity technologies whose seamless operation is essential for today's healthcare organizations, whether delivering on-site care or telehealth sessions. Understand why these technologies can help improve patient care, boost employee satisfaction and retention, and increase operational efficiency. And learn why essential to any technology strategy is a managed service partner committed to monitoring infrastructure and proactively identifying—and addressing—any issues before they affect your community's health or data security.

1:15PM

Breakout Tours

This session will break the audience into two groups that will tour the C Spire data center and the UMMC Center for Telehealth.

UMMC Center for Telehealth

Tour of the UMMC Center for Telehealth (onsite)

Cspire Data Center
